#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 11 January 2007.
- 2a) ☐ This action is FINAL.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, filed 01/11/2007, with respect to amended independent claims 1 and 24 have been fully considered and are persuasive.

Applicant's arguments with respect to claims 17 and 18 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 17 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Huang et al. [US 6,384,353].

Claim 17, Huang et al. discloses a method of operation of a microscopic switch, comprising: engaging the switch [col. 3 lines 45-48]; signal transmission through the switch [121 and 122] once engaged; disengaging the switch once the signal is transmitted [figure 5]; preventing of warping of a flexible beam [133] that is configured to at least operate as a throw arm once the temperature-independent microscopic switch is engaged by restraining upward warping movement of the flexible beam from a

nonengaged position [150 limits the upward movement of the beam 133] while permitting downward movement of the flexible beam to a sufficient degree to allow engaging the switch.

Claim 18, Huang et al. discloses the method of Claim 17, wherein the step of preventing of warping further comprises one or more engaging tethers [131].

***Allowable Subject Matter***

Claims 1-6, 24-30 and 38 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claim 1, the prior art of record does not teach nor suggest, in the claimed combination, a temperature independent microscopic switch with a conductive beam suspended from an anchor to a substrate, and at least one tether, with one end attached to a fixed location and the other end attached to the conductive beam away from the anchor.

Claim 24, the prior art of record does not teach nor suggest, in the claimed combination, a cantilever MEMS switch with a cantilever arm having a portion attached to a substrate and a movable portion; and a tether having at least two ends, a first end coupled to a fixed location substrate, and a second end is at least coupled to the movable portion of a cantilever arm.

**Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bernard Rojas whose telephone number is (571) 272-1998. The examiner can normally be reached on M and W-F, 5:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Elvin G. Enad can be reached on (571) 272-1990. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
